MAKEUP ARTIST

CINEMA, SET

& SPECIAL EFFECTS

● BIOGRAPHY

The art of makeup goes far beyond a few brush strokes. It requires considering the vitality of the skin, the emotional state of the person being made up, and using makeup in harmony with the lighting.

To enhance, transform, and get close to reality without it being visible, without the product being felt—that is the subtlety of our craft.

The skin is our canvas, constantly changing with every passing second, and we must know how to adapt to it under all circumstances.
